

CONTENTS

INTRODUCTION ix

ACKNOWLEDGEMENTS x

FOREWORD xii

1. THE DEVELOPMENT OF THE BREED 1
 - What's in a Name? 1
 - Probable Origins of the German Shorthaired Pointer 2
 - Breed Development in Germany 7
 - Eighteen Seventies to the End of the Century 7
 - Turn of the Century to the Thirties 7
 - Thirties to the Seventies 11
 - Conclusion 13
2. THE HISTORY AND DIVERSITY OF GSP COAT COLOUR AND PATTERN 15
 - The Origins of Variety 15
 - The Liver and Whites (Ticked and Roan) 16
 - The Solid Livers 18
 - The Whites 21
 - The Blacks 23
3. A QUESTION OF TYPE 29
 - Interpreting Breed Standards 29
 - Uniformity of Interpretation 29
 - Type Based on Function 30
 - Over-Specialisation of Type 31
 - The Relative Importance of Certain Characteristics 32
 - Size 32
 - Bodily Proportions and Structure 32
 - Head Type 34
 - Temperament 34
 - Coat Colour/Pattern 35
 - Summary: Assessing Type 35
4. THE BREED STANDARDS COMPARED 37
 - Introduction 37
 - General Appearance 38
 - Characteristics 39
 - Symmetry 40
 - Temperament 40
 - Head and Skull 40
 - Eyes 42
 - Ears 44
 - Nose 45
 - Mouth, Teeth, Bite 45
 - Neck 46
 - Forequarters 47
 - Body, Chest, Thorax 48
 - Back, Loin, Trunk, Croup 48
 - Hindquarters 49
 - Feet 50
 - Tail 50
 - Gait/Movement 52
 - Coat and Skin 53
 - Colour 54
 - Weight and Size 56
 - Bone 56
 - Faults, Notes, Disqualifications 57
5. TITLES AND QUALIFICATIONS 59
 - Show Titles: 59
 - Britain 59
 - Singapore 59
 - USA 60
 - Canada 61
 - Europe (FCI) 61
 - Australia 62
 - New Zealand 62
 - Comparison of Methods for Gaining Show Titles 62
 - Field Titles: 63
 - Britain 63
 - USA 63
 - Germany 65
 - Holland 69
 - Australia 69
 - New Zealand 72
 - Comparison of Requirements for Field Championship Status 73
 - Obedience/Working Titles: 73
 - Britain 73
 - USA 75
 - Australia 77
 - New Zealand 79
 - Germany (Schutzhund) 81
 - The Importance to the Breed of the Various Spheres of Competition 81
6. GERMAN BREED HISTORY 83
 - Introduction 83
 - Kennels and Breeders 83

- The Breed Clubs and Publications 118
 - German-Bred Champions and Kleeman/Diana Trial First Prize Winners 119
 - German Champions and Kleeman-dogs Bred Elsewhere 125
 - Top Producing German Sires 125
 - Top Producing German Dams 126
7. BREED HISTORY IN THE NETHERLANDS 127
- Introduction 127
 - Kennels and Breeders 128
 - The Breed Club and Publication 133
 - Netherlands Champions 134
 - Top Producing Netherlands Sires 136
 - Top Producing Netherlands Dams 136
8. BREED HISTORY IN THE USA 137
- Introduction 137
 - Kennels and Breeders 141
 - The Breed Clubs and Publications 183
 - Imports into the USA and Canada 185
 - The USA Dual Champions, with Their Sires and Dams 189
 - Top Producing USA Sires 191
 - Top Producing USA Dams 193
 - Top Producing USA Sires (Obedience Only) 195
 - Top Producing USA Dams (Obedience Only) 196
 - Hall of Fame 196
9. BRITISH BREED HISTORY 198
- Introduction 198
 - Kennels and Breeders 203
 - The Breed Clubs and Publications 221
 - Imports into Great Britain 222
 - English Champions, with Their Sires and Dams 223
 - Top Producing UK Sires 226
 - Top Producing UK Dams 227
10. A HISTORY OF THE BREED IN AUSTRALIA AND NEW ZEALAND 228
- Introduction 228
 - New Zealand — Kennels and Breeders 233
 - New Zealand Breed Clubs and Publications 239
 - Australia — Kennels and Breeders 239
 - Australian Breed Clubs and Publications 276
 - Imports into Australia and New Zealand 279
 - Australian/New Zealand Triple and Dual Champions 280
 - Top Producing Australian/New Zealand Sires 281
 - Top Producing Australian/New Zealand Dams 282
11. BASIC GENETICS 284
- The Common Denominator, The Single Cell 284
 - The Blueprint for Life 284
 - Chromosomes 285
 - Gametes, Mitosis, Meiosis, Linkage and Crossing Over 285
 - Genes 286
 - Gene Loci and Alleles 286
 - Dominant and Recessive Genes 287
 - Describing Recessive Allele Variations 287
 - Homozygous and Heterozygous States 287
 - Phenotype and Genotype 287
 - Modifying Genes 287
 - Incomplete Dominance 288
 - Incomplete Penetrance and Variable Expressivity 288
 - Standardisation of Breed Characteristics/Polygenetic Inheritance 288
 - Continuous Variation and Drag of the Mean 289
 - Environmental Factors and Heritability 289
 - Acquisition and Use of Genetic Knowledge 289
12. COAT COLOUR/PATTERNING WITH PARTICULAR REFERENCE TO THE GSP 290
- Gene Loci for Coat Colour and Pattern 293
 - Outcomes of Matings in Regard to Colour and Pattern 295
13. INHERITANCE OF DEFECTS 301
- The Origins of Variety 301
 - Bad Bites and Poor Dentition 301
 - Undershot jaws 301
 - Overshot jaws 302
 - Missing teeth 302
 - Conclusions and Possible Avoidance Mechanisms 303
 - Skin and Coat Problems 303
 - Allergies and Associated Conditions 303
 - Thin and Soft coats 304
 - Fur Ridges 304
 - Conclusions and Possible Avoidance Mechanisms 304
 - Eye Conditions 305
 - Entropion 305
 - Ectropion 305
 - Trichiasis, Distichiasis 306
 - Strabismus (Crosseyes) 306
 - Conclusions and Possible Avoidance Mechanisms 306
 - Skeletal and Joint Abnormalities 307
 - Hip Dysplasia 307
 - O.C.D. (Osteochondritis Dissecans) 308
 - Conclusions and Possible Avoidance Mechanisms 309

Breeding and Reproductive Problems	309	The Right Time for Mating	335
Infertility	309	Training a Stud Dog	335
Infrequent/Too Frequent Seasons,		Introducing the Bitch	336
Phantom Pregnancies	309	The Mating	337
Uterine Inertia	309	The Pregnancy	339
Physical Defects (Cryptorchidism, Vaginal		Preparations for Whelping	339
Strictures)	310	Some Statistics Regarding Whelping	339
Hermaphrodites	310	Whelping	342
Conclusions and Possible Avoidance		After Whelping	345
Mechanisms	311	Caesarian Sections	345
Disorders of the Digestive Tract	311	Post Natal Care	346
Malabsorption/Pancreatic Disease	311	Orphaned Pups	346
Gastric Torsion	311	Early Puppy Care and Docking	347
Conclusions and Possible Avoidance		Feeding	347
Mechanisms	311	Worming	348
Temperament Problems	311	The Critical Developmental Stages/Puppy	
Hyperactivity	312	Socialisation	348
Excessive Noisiness	312	Assessing Pups	352
Conclusions and Possible Avoidance		Conformation and Movement	352
Mechanisms	312	Temperament and Working Ability	354
Extreme Shyness (Non-Aggressive)	313	Summary	355
